

# Product Overview 2008/09

## Barryvox VS 2000 Pro

### The Analog Beacon with Superior Performance

- Leading range in the industry: max. 120 m
- Search strip width 75 m
- Connector for professional PELTOR headset
- Sturdy and compact design

## Barryvox VS 2000 Pro Recco

### Double Safety - The First Avalanche Beacon with Integrated RECCO Reflector

- Leading range in the industry: max. 120 m
- Search strip width 75 m
- Integrated RECCO reflector
- Connector for professional PELTOR headset
- Sturdy and compact design

## Barryvox Accessories

Professional PELTOR headset

Lightweight earphone

Carrying system

## Barryvox S2

### The Emergency Transmitter for Avalanche Victims

- Frequency 457 kHz to international standard EN 300'718
- Permanent monitoring of transmission signal strength and battery status
- Adjustable belt for secure wear
- Compact, robust design

## Terrestrial Beacon Search System Barryvox VS 2000 Pro Ext

- Beacon receiver Barryvox VS 2000 Pro Ext
- External 1-dimensional antenna with strong directional characteristic
- Range up to 180 m
- Professional PELTOR headset

## Beacon Search System for Victim Search from Helicopter

- 3-dimensional receiving antenna
- The worldwide proven standard for helicopter search

Equipment

Transport Bag

## Efficient RECCO Search by Helicopter

Via a special connecting cable the RECCO detector signal is forwarded to the helicopter INTERCOM system

## Training Transmitter TT 457

- From first signal acquisition to pinpoint search within a few meters
- Adjustable signal strength
- Selectable transmit signal pattern

## Beacon Training System RTX 457

### with Radio Control and Probe Hit Feedback

- Portable system
- 4 or 6 beacon transmitters
- Remote control unit
- Suitcase

## Search Training System with Probe Hit Feedback

### System including:

- Portable control unit
- Up to 16 avalanche transmitters for permanent installation with target for probing and a battery life time of one full winter season

## Avalanche Training Center ATC

### Permanently Installed Training Center with Probe Hit Feedback

### System including:

- Control unit for permanent installation
- Up to 16 avalanche transmitters for permanent installation with target for probing and a battery life time of one full winter season

## Beacon Checkpoint

- Indicates a transmitting beacon in close vicinity
- 3-dimensional avalanche beacon receiver
- Range up to 5 m (adjustable)

## Checkup System CS 3000

### The Versatile Test and Configuration Station for the Mammot Barryvox (OPTO 3000)

### Checkup System CS 3000 including:

- Checkup System CS 3000
- PC software (Win 98/NT4/2k/XP)
- Operating manual
